

Day 31 coding Statement : Write a Program to Toggle each character in a string

Description: Get an input string from user and then convert the lower case of alphabets to upper case and all upper-case alphabets into lower case.

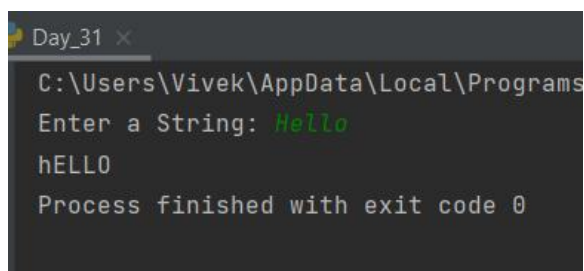

Input: Hello

Output: hELLO

CODE:

```
string = input("Enter a String: ")
for i in string:
    if i.islower():
        upper = i.upper()
        print(upper, end="")
    else:
        lower = i.lower()
        print(lower, end="")
```

OUTPUT:

A screenshot of a terminal window titled "Day_31". The window shows the execution of a Python program. The first line is the file path "C:\Users\Vivek\AppData\Local\Programs". The second line is the prompt "Enter a String:" followed by the user input "Hello" in green. The third line is the output "hELLO". The fourth line is the message "Process finished with exit code 0".

```
Day_31 x
C:\Users\Vivek\AppData\Local\Programs
Enter a String: Hello
hELLO
Process finished with exit code 0
```
